

Agent Level Changes

The following section contains changes that are active system wide and available to users based on their assigned security levels.

User Preferences - Hotsheet and Tour/Open House Reports

Action Item: N/A

Changing your report preferences for Hotsheet and Tour/Open House just got easier! Previously for listing reports, you can now change your default result options for Hotsheet and Tour/Open House right from the available reports drop-down.

The screenshot shows the Paragon MLS interface with a Hotsheet report open. The report displays a list of properties with columns for Picture, MLS #, Class, Building Type, Area, Price, and Address. A dialog box titled "Default Hotsheet Report" is overlaid on the report, allowing the user to select a default report from a dropdown menu. The dropdown menu is currently set to "Hotsheet Spreadsheet".

?	Picture	MLS #	Class	Building Type	Area	Price	Address
1		40733349	RESIDENTIAL	Detached	Brentwood		26010 E N 112 st Beach
2		40733349	RESIDENTIAL	Detached	Brentwood		26010 E N 112 st Beach

Clicking the gear icon opens a dialog box where you can set your default report preference

Paragon 5.82 Release Enhancements

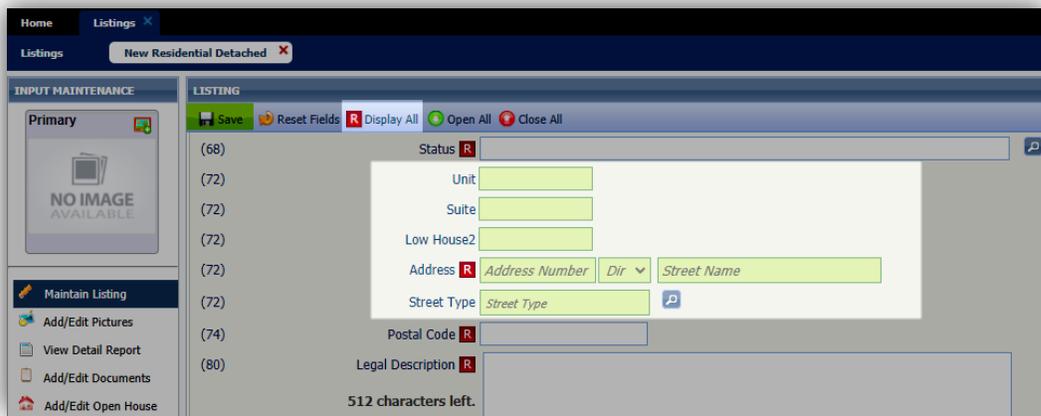

Improved Handling of Street Address fields

Action Item: N/A

We've improved Paragon's handling of address fields to help ensure data integrity. When Low House Number, Address-Unit and Address-Suite are enabled, those fields will display as part of the green-highlighted street address fields in Listing Input and in Search.

Additionally, when Required Only is selected in LIM, if any part of the street address is required, all the green-highlighted street address fields will remain visible.

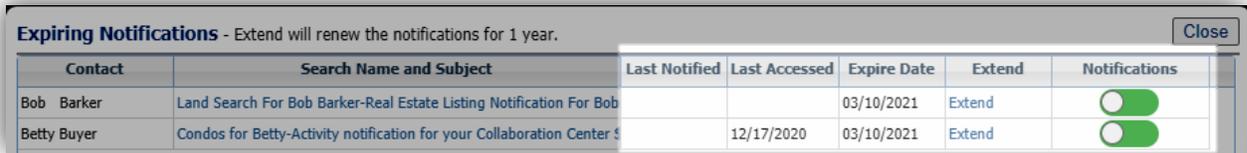

Notes: Low House does not appear as a separate field in Paragon Search modules but is included when searching the Address Street Number field.

Paragon 5.82 Release Enhancements

Expiring Notifications – Minor UI adjustments

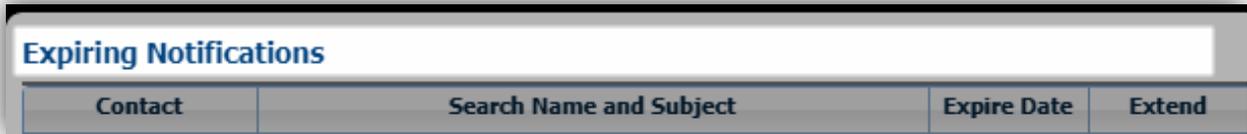

Action Item: N/A

Based on user feedback, we made a few changes to the new Expiring Notifications modal. The columns were rearranged to put the two action columns -Extended and Notifications (on/off) at the end of the row.

Contact	Search Name and Subject	Last Notified	Last Accessed	Expire Date	Extend	Notifications
Bob Barker	Land Search For Bob Barker-Real Estate Listing Notification For Bob			03/10/2021	Extend	<input checked="" type="checkbox"/>
Betty Buyer	Condos for Betty-Activity notification for your Collaboration Center \$		12/17/2020	03/10/2021	Extend	<input checked="" type="checkbox"/>

We also noticed the explanatory text by the modal header was missing when opening the modal from the Messages widget. That’s been fixed so the text always displays.

Contact	Search Name and Subject	Expire Date	Extend
---------	-------------------------	-------------	--------

Power Search – Exclude Offices when “Include in Roster= N”

Action Item: N/A

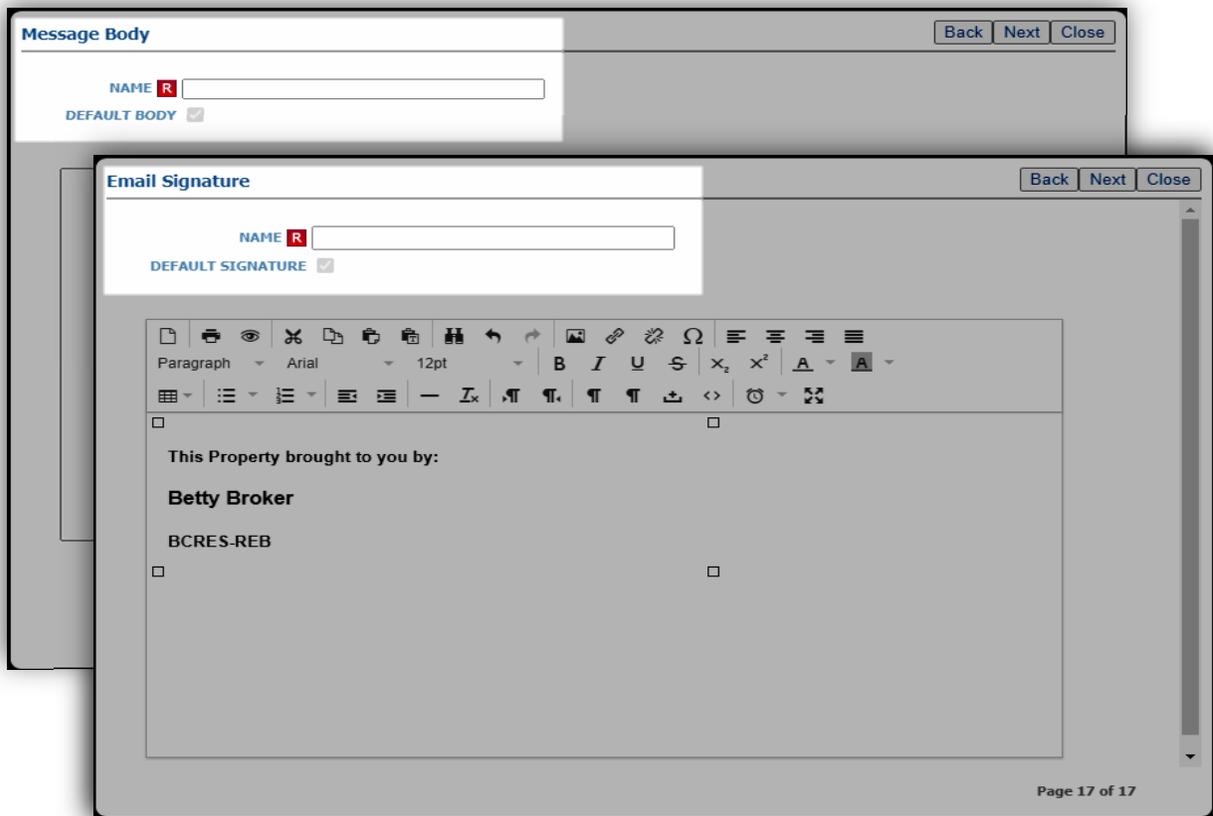

If an office record has the Include in Roster flag off, users below security level 7 are unable to view those offices in the Membership Roster. To avoid confusion, when the user’s security level does not allow visibility of those offices, they will be excluded from the Power Search results.

Paragon 5.82 Release Enhancements

Preference Wizard – Message Body and Email Signature pages

Action Item: N/A

To clarify the workflow in the Preferences Wizard, the Required 'R' icon has been added to the Name field, and the Default checkbox is selected on both the Message Body and Email Signature pages. This ensures that any changes made to these pages will be saved. The default can be changed through Preferences when additional Message Bodies or Email Signatures are created.

Paragon 5.82 Release Enhancements

Add Purge Date to Partial Listings Table

Action Item: N/A

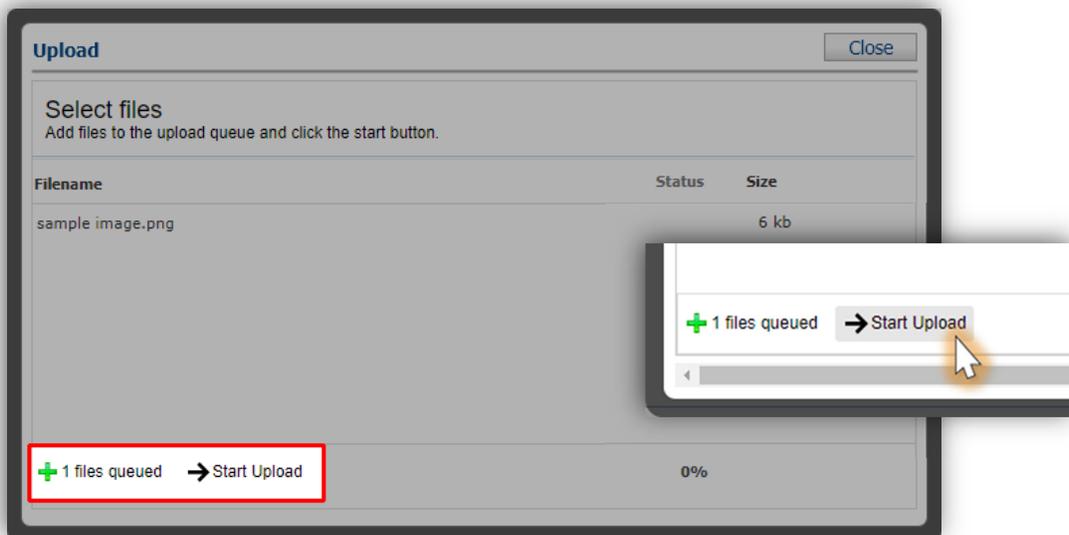

To assist you in tracking when your partial listings will be purged from the system, a new column has been added called Purge Date. It will calculate and display the date partial listings will be purged from the system.

City	State	Status	Building Type	Listing Agent	Picture Count	Expire Date	Purge Date	Action
SAN FRANCISCO	CA	Partial Listing-PAR	Detached	John P Lee	0	12/11/2019	9/12/2019	Select an Action...
ANTIOCH	CA	Partial Listing-PAR	Detached	BOJIANK MO	1	6/26/2019	9/12/2019	Select an Action...
OAKLAND	CA	Partial Listing-PAR	Detached	Richard Goh	1	12/12/2019	9/13/2019	Select an Action...
CONCORD	CA	Partial Listing-PAR	Townhouse	Peter Trinh	0	9/30/2019	9/13/2019	Select an Action...
ANTIOCH	CA	Partial Listing-PAR	Detached	DONNA BOLAND	30	8/28/2019	9/14/2019	Select an Action...
FREMONT	CA	Partial Listing-PAR	Detached	Eric Contreras	0	7/31/2019	9/14/2019	Select an Action...

Updated Button Styles

Action Item: N/A

The buttons in the Upload dialog boxes have been updated with a lighter weight style that matches other buttons throughout Paragon. When the mouse pointer is hovering over the button, the button highlights to communicate that it's actionable.

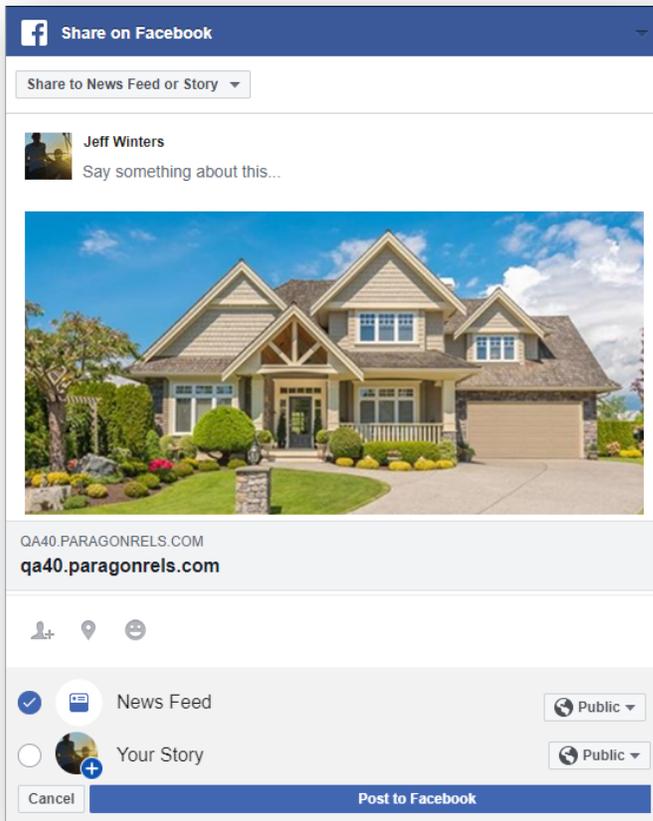

Paragon 5.82 Release Enhancements

More control when sharing to Facebook

Action Item: N/A

When sharing to Facebook from Paragon and Collaboration Center, you now have more control where your posts will display in Facebook and the content of the post. For example, instead of displaying Look at these Listings, the user will be able to type in any verbiage of their choosing. Also, users can share via the various options like Story, Group, etc.

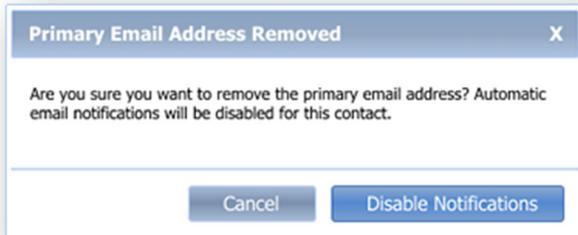

Paragon 5.82 Release Enhancements

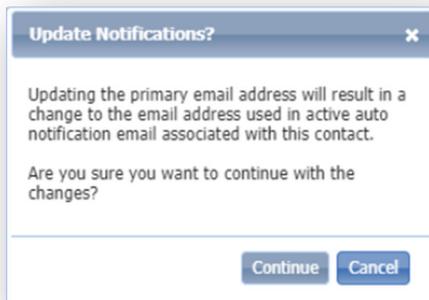

Disable Contact Notifications when primary email is removed

Action Item: N/A

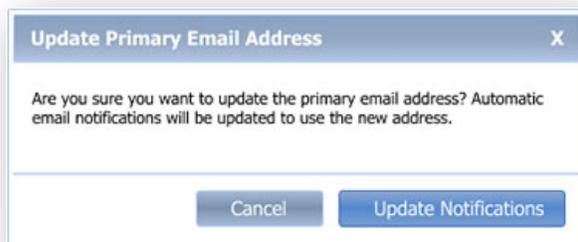

A message has been added which allows the user to confirm changes if the primary email address has been removed for a contact who has automatic notifications enabled. If the user confirms the change, the system will disable all automatic notifications for buyer activity, seller activity, and agent recommended.

When a primary email address has been edited, and the contact has automatic notifications enabled the user was previously presented with this confirmation message when focus left the email address field.

We've updated the message to be more concise and we changed it to display upon Save rather than when focus leaves the email address field.

Paragon 5.82 Release Enhancements

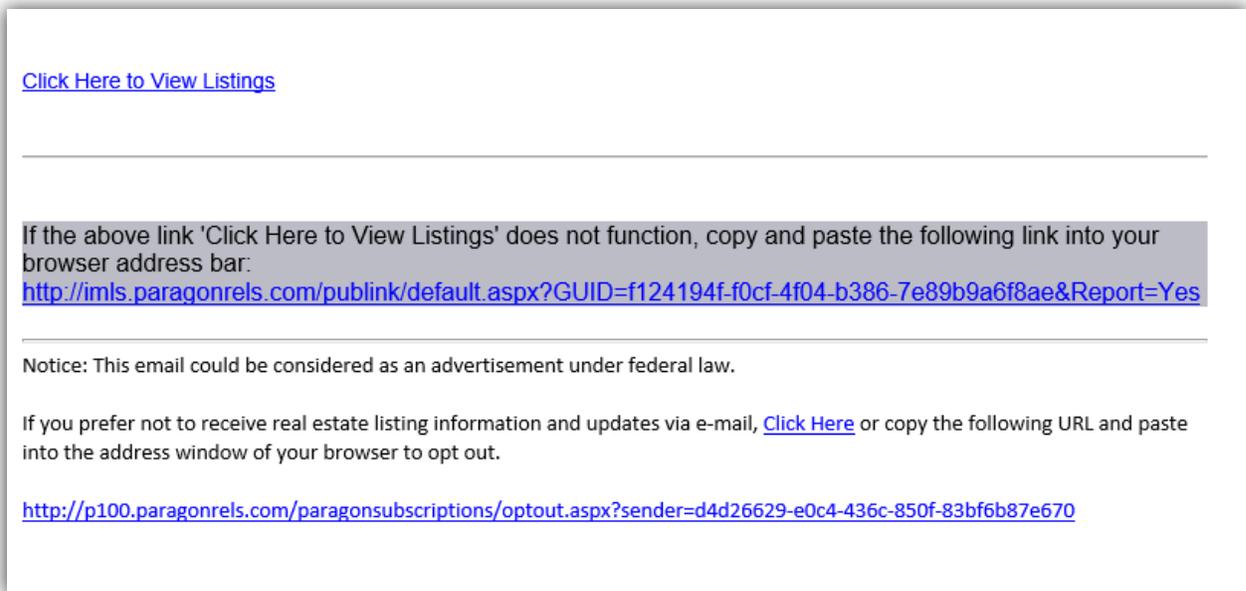

Simplification of the Email Footer

Action Item: N/A

To simplify the appearance of emails from Paragon, we have removed the full URL for the “Link to Listings” as well as the extra text and full URL for the Opt Out functionality. The full URLs were needed years ago when certain browsers did not support text links. In addition, if a user currently has text only email, the “Click Here to View Listings” still displays the full URL, so the additional data in the footer was superfluous.

Now recipients will see a simple and familiar “Unsubscribe” option in the footer of the email.

Email body and footer prior to 5.82

Click Here to View Listings

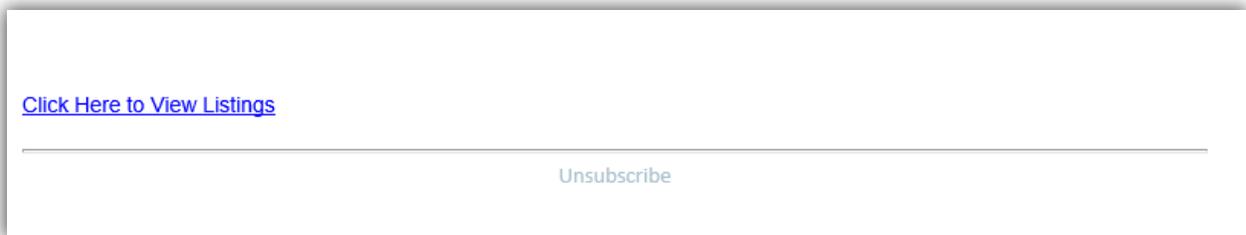

If the above link 'Click Here to View Listings' does not function, copy and paste the following link into your browser address bar:
<http://i/mls.paragonrels.com/publink/default.aspx?GUID=f124194f-f0cf-4f04-b386-7e89b9a6f8ae&Report=Yes>

Notice: This email could be considered as an advertisement under federal law.

If you prefer not to receive real estate listing information and updates via e-mail, [Click Here](#) or copy the following URL and paste into the address window of your browser to opt out.

Collaboration Center

All options in this section are either configurable via MLS Administration controls or by your System Support Manager as noted.

Collaboration Center - Radius

Action Item: N/A

Radius searching in the Collaboration Center has been made easier for you and/or your clients to search. Users can simply enter an address, click submit and your radius is ready to go! We have also updated the help verbiage to assist you while searching.

Paragon 5.82 Release Enhancements

Collaboration Center - Compare Workflow

Action Item: N/A

The compare workflow is a feature that allows you and/or your client to compare listings side by side while in the Collaboration Center.

To improve this workflow, Black Knight added a compare icon next to the folder icon. This will appear on each listing. To compare two listings, start by clicking this new icon next to the first listing you want to compare. The icon will turn orange and you will see a count of 1. Click the compare icon on a second listing to launch the compare screen. After you are finished comparing the two listings, click close to end the compare feature and remove your selections.

NOTE: A tooltip appears over the compare icon, "Compare 2 Listings"

Paragon 5.82 Release Enhancements

The screenshot displays the Paragon Collaboration Center interface. At the top, there is a blue navigation bar with a menu icon, the text "Black Knight MLS Solutions", the user name "Stacy Johnson", a search icon, and a help icon. Below this is a grey header area with a "COLLABORATION CENTER" title, a welcome message "Welcome, Stacy Johnson", and a profile for "Nate Bassi" with a "CONTACT ME" button. A secondary navigation bar contains tabs for "BUYER ACTIVITY" and "SELLER ACTIVITY". Below that is a main navigation bar with "LISTING ACTIVITY" (selected), "RECENT SALES", "COMMUNICATION", and "SAVED FOLDERS". The main content area features a red "CLOSE" button in the top right. Two property listing cards are shown side-by-side. The first card displays the address "2218 N Fountainhead Way" and a price of "\$710K". Below the address are tabs for "Photos", "Map View", and "Street View", with "Photos" selected. The second card displays the address "3005 W Crescent Rim Drive" and a price of "\$917", also with "Photos", "Map View", and "Street View" tabs. Each card contains a large photograph of the respective property.

Paragon Connect

All options in this section are either configurable via MLS Administration controls or by your System Support Manager as noted.

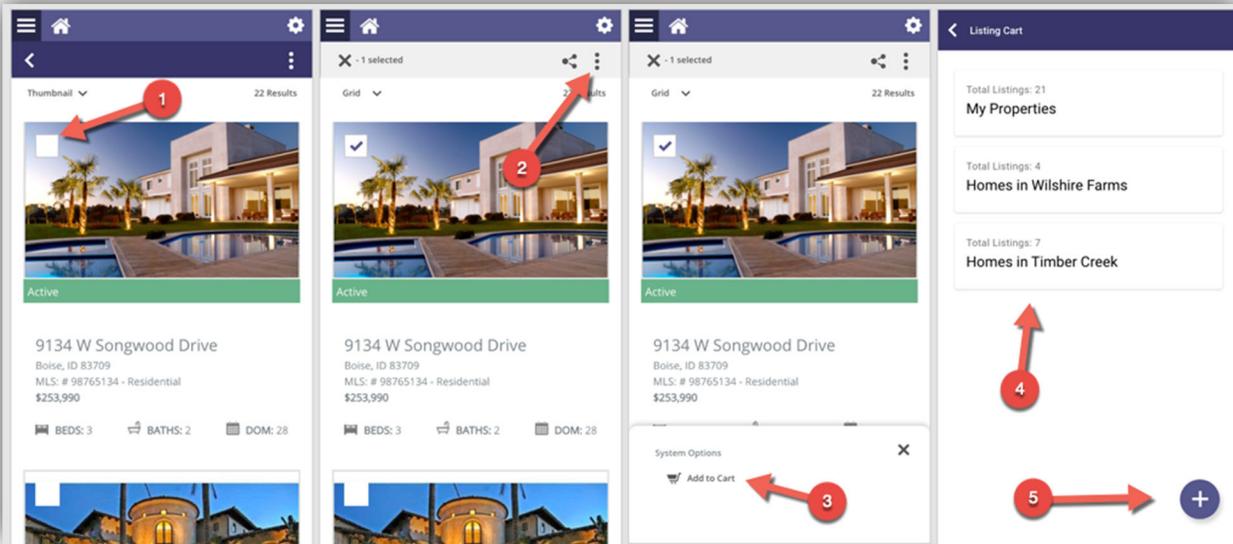

Agent Listing Cart

Action Item: N/A

Black Knight is excited to present Paragon Connect Agent Listing Cart! With listing cart capabilities, you will be able to collect and store listings from anywhere in the system. Whether you are running a property search, power search, open house, etc. you will find the ability to save and store listings in a listing cart. Having the ability to create and manage a collection of listings is extremely important. Below is a summary of how to quickly add a listing to a cart

Overview Workflow:

1. Check one or more listings
2. Click the overflow menu
3. Click "Add to Cart"
4. Choose an existing cart
5. If no cart is created or you wish to create a new cart, click the + icon.

Paragon 5.82 Release Enhancements

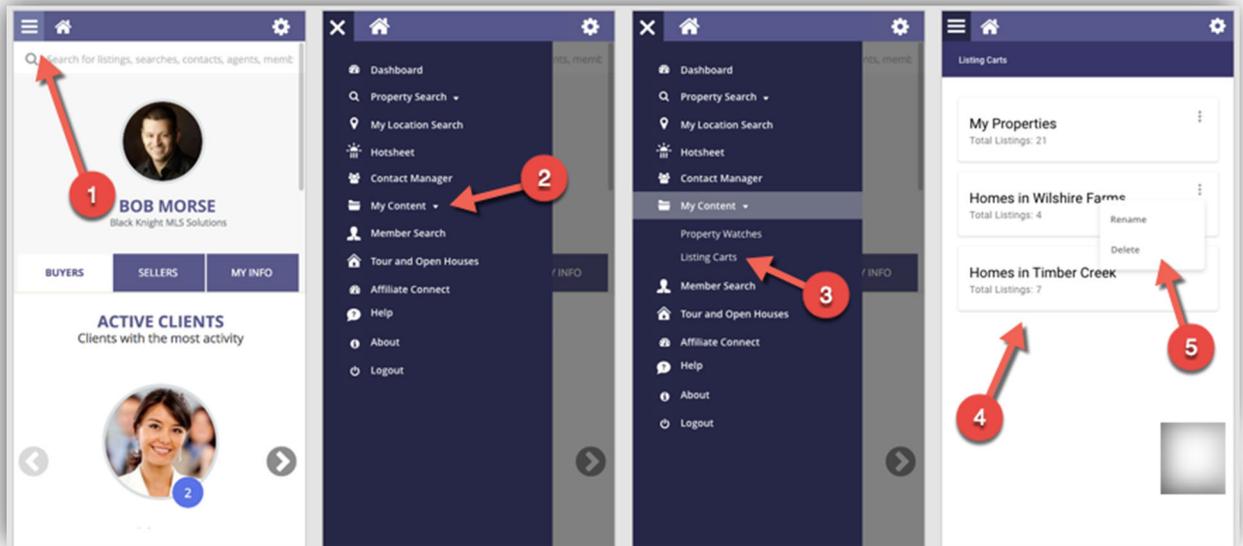

Access Agent Listing Carts

Action Item: N/A

You can quickly view your listing carts by navigating to the “My Content” section of the left navigation menu. Here you will find a new option called “Listing Carts.” You can instantly view the listings in the cart, rename the cart, or even delete the cart all together. You can even view the cart and remove individual listings you no longer wish to include in the cart.

Overview Workflow:

1. Navigate to the left navigation (hamburger menu)
2. Click or tap “My Content”
3. Click or tap “Listing Carts”
4. Click on any listing cart to view the listings in that cart.
5. You can even rename or delete entire cart

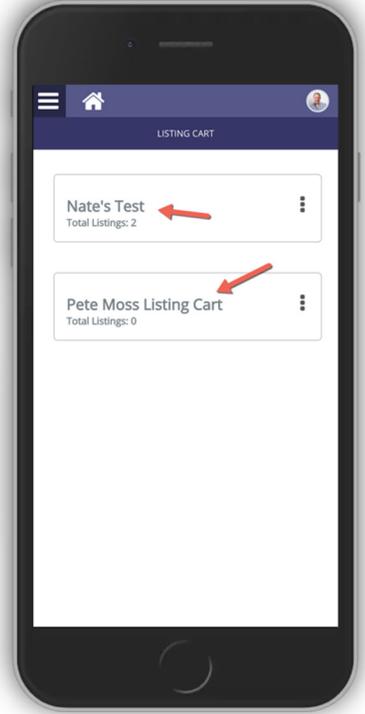

Paragon 5.82 Release Enhancements

Syncing Listing Carts

Action Item: N/A

Listing carts created in either Paragon Connect or Paragon Classic will display in either application. Carts, listings, modifications all work together to provide you with a seamless experience. When 5.82 is deployed, rest assured you will find all the listing carts you created in Paragon Classic available in Paragon Connect.

	Find:	Type: All	My Active Listings: 1 My Office's Active Listings: 15		
	Description	# Of Listings	Changed	Date Created	Date Modified

<input type="checkbox"/>	Pete Moss Listing Cart	0	0	11/16/2020	11/16/2020

Calculator Terms

Action Item: N/A

Adjustments were made to the Mortgage Calculator in Paragon Connect to allow you to enter any term you would like. Previously you could only choose a term of either 15 or 30 years. The default will be set at 30 years.

Paragon 5.82 Release Enhancements

Copy Link

Action Item: N/A

A new share feature has been added to the application. While viewing a single listing or multiple listings, clicking on the share icon will now reveal a new “Copy Link” option. This allows you to copy a direct link to our “CollabLink” view. CollabLink is the location where you can send clients a public report view of the selected listings. The same option exists today inside your Paragon Classic system.
